

From a sketch to a space.

SELECTED PROJECTS · 2026

Built by us. Made for you.

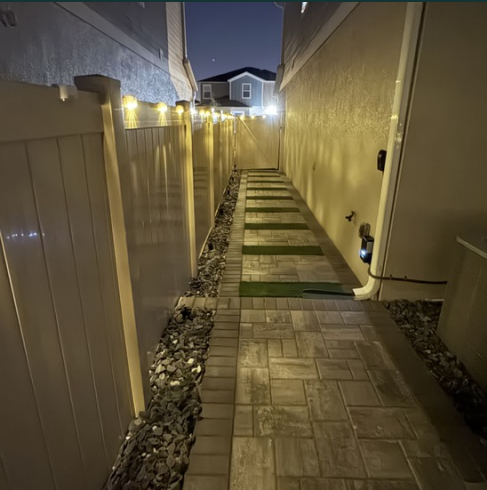

ONE HOME. SO MANY POSSIBILITIES.

Inside. Outside. Made for you.

One team to turn the space you have into the place you want to be. From custom-built interiors to a beautifully lit yard, Essa Colors brings design and hands-on work together.

We draw it. We build it. We install it.

01	The workshop	03
02	Themed rooms	04
03	Pavers & outdoor living	11
04	Landscaping & lighting	14
05	Remodeling & electrical	18

Care starts at the workbench.

Before a panel enters your home, it is marked, cut and assembled in our shop. The same crew follows the piece through to installation.

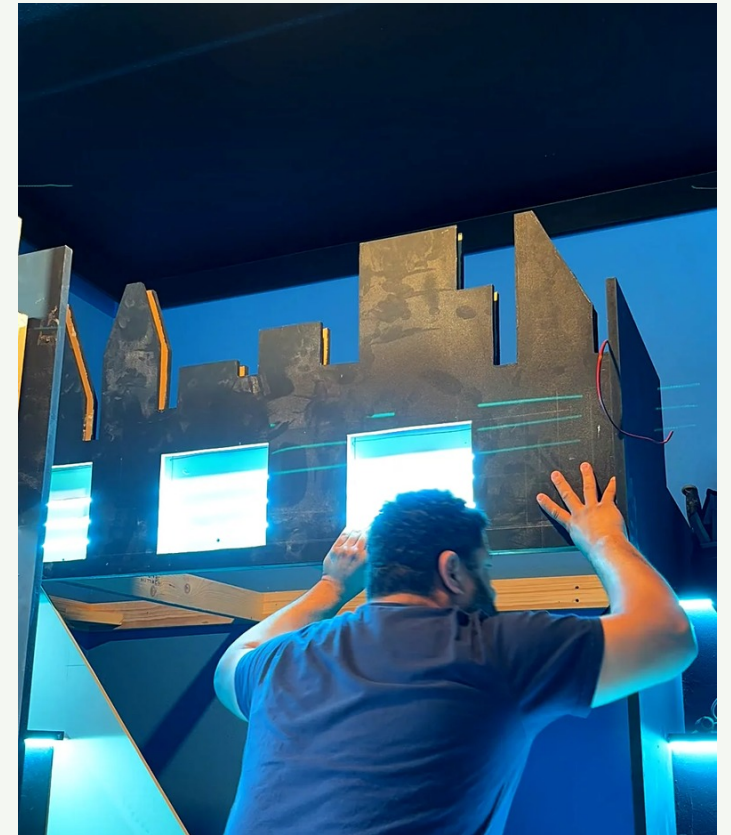

01 / Mark

Every piece starts with its measurements.

02 / Build

Cutting and assembly in the workshop.

03 / Install

The finished piece finds its place.

A city inside a room.

A city skyline takes shape in cut panels. Illuminated windows, indirect light and built-in elements become part of one composition.

PANELS + LAYERS + LED

From a raw panel on the bench to the installed scene.

THEMED ROOMS / 02

A little castle at home.

Arched openings, battlements and a soft palette set the scene. A chandelier and an ornamental ceiling detail complete the atmosphere.

ARCHES + TEXTURE + LIGHT

The theme lives in the architecture and the finer details.

Room to get in the game.

Blue, yellow and lines of light organize the room. An integrated desk and wall panels connect the spaces for gaming, studying and play.

DESK + PANELS + LED

Geometry and lighting designed together.

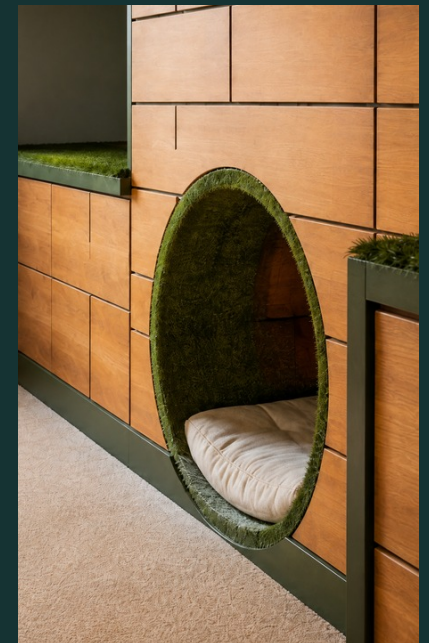

CREATIVE EXPLORATION / 04

A new way to play.

A playful interior concept: wood panels, green accents and a cushioned circular opening explore the relationship between space, texture and play.

WOOD + TEXTURE + FORM

Illustrative concept. Not a completed project.

Color fills the room.

Colorful block patterns wrap the room from floor to ceiling. An integrated bunk, round lights and yellow details carry the idea through.

PANELS + BUNK + CEILING

One visual idea carried throughout the room.

THEMED ROOMS / 06

Textures that set the mood.

Exposed brick, ceiling beams and a ring chandelier give the room a warm character. Light brings out the texture of the materials and the depth of the space.

BRICK + BEAMS + WARM LIGHT

The finish connects the walls, ceiling and lighting.

The same idea. At every step.

Woodwork and lighting are planned together. The panel takes shape on the bench, then becomes part of the room.

IN THE WORKSHOP

DURING INSTALLATION

IN THE ROOM

Home extends outdoors.

Pavers, turf and light.
A backyard to enjoy long after the day is
done.

ONE PROJECT. TWO MOMENTS.

Space by day. A gathering place at night.

DAY

The same backyard brings together paver walkways, a green lawn and open space for the family.

NIGHT

Lighting along the fence defines the perimeter and creates a different atmosphere after sunset.

Every corner can become something more.

Even a side passage can find a new purpose. A putting green, a paver walkway and a continuous line of light make the space part of the home.

WALK. PLAY. ENJOY.

A new light. A fresh perspective.

Light on palms, planting beds and the façade. The composition reveals depth and brings the home and garden together.

LIGHT REVEALS.

The garden is part of the scene.

TEXTURE IN FOCUS

Light washes across the facade, bringing out the texture of its materials.

ILLUMINATED PLANTING

Pools of light bring rhythm to the planting bed and definition to the greenery.

The finish changes everything.

**Defined edges.
Materials in
harmony.**

The planting bed is prepared with landscape fabric, mulch and a decorative stone border. Defined edges create a clean transition between the garden and paving.

THE SAME PLANTING BED

Five steps. A refreshed garden.

02

Clear & prepare

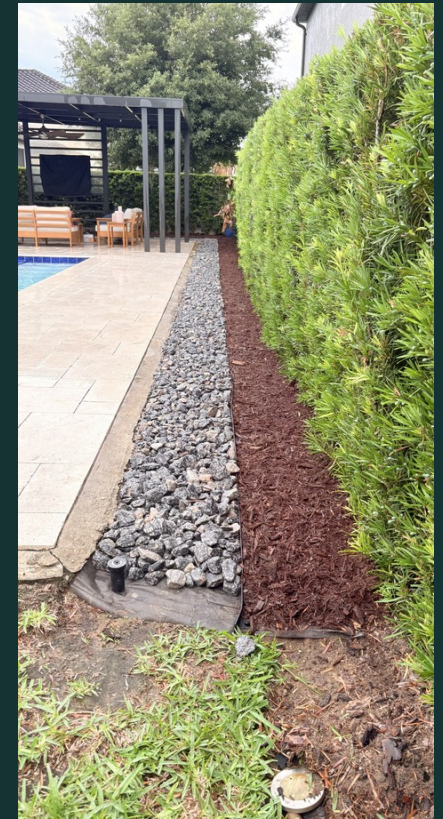

03

Landscape fabric

04

Mulch layer

05

Stone & finish

Care shows in the details.

Panels, molding, wall finishes and ceiling details bring a room together. Custom woodwork connects form, function and finish.

WALLS • CEILINGS • WOODWORK

LIGHTING BUILT INTO THE PROJECT

Light is part of the design.

LED lighting in panels, ceiling coves and outdoor spaces is planned alongside the custom woodwork and finishes.

COORDINATED ELECTRICAL WORK

When a job requires a licensed electrician, Essa Colors coordinates that work and includes it in the estimate.

It starts with a conversation.

01

Show us the space.

Send photos of the space and tell us what you would like to change.

02

Shape the project.

Discuss the design, materials and scope. The estimate comes before fabrication.

03

See it take shape.

The pieces are prepared in the workshop and installed by the crew.

Want to see the process in motion?
